

ABDUR REHMAN

Azure Data Engineer

+92 347 7204 950 | abdurrehman0702@gmail.com | Lahore, Pakistan | <https://www.linkedin.com/in/abdur-rehman-7a8830353/> | <https://github.com/abdurrehman52>

PROFESSIONAL SUMMARY

Results-oriented Azure Data Engineer with hands-on experience designing and deploying cloud-based ETL pipelines, Delta Lake architectures, and real-time data streaming solutions using Azure Data Factory, Databricks, and Apache Spark. Demonstrated ability to build end-to-end data workflows and deliver client-facing solutions while pursuing a BS in Information Technology (CGPA: 3.5). Eager to contribute to data-driven decision-making in a dynamic multinational environment.

TECHNICAL SKILLS

Cloud & Big Data: Azure Data Factory (ADF), Azure Databricks, Azure Data Lake Storage Gen2, Azure Blob Storage, Azure SQL Database

Data Engineering: ETL/ELT Pipeline Design, Delta Lake, Apache Spark, PySpark, Spark Streaming, Databricks Autoloader

Programming: Python, SQL, JavaScript, PHP

Visualisation: Power BI, Dashboard Development

Web Technologies: React.js, Node.js, HTML, CSS, Bootstrap, Tailwind CSS, Funnel Design

Tools & Practices: Git, Agile Collaboration, Cross-functional Client Communication

PROFESSIONAL EXPERIENCE

Web Developer & Funnel Designer | International Webcraft — Remote — India Jun 2024 – Mar 2025

- Designed and launched high-performance marketing funnels on Deal.ai, optimizing page load speed and ensuring full cross-device compatibility for client campaigns.
- Collaborated with UI/UX designers and product stakeholders to translate business requirements into responsive, goal-driven web solutions.
- Managed end-to-end client communication cycles — gathering requirements, delivering iterative updates, and resolving design and performance issues within agreed timelines.
- Maintained clean, modular codebases across multiple concurrent projects using HTML, CSS and JavaScript.

PROJECTS

End-to-End Azure ETL Data Pipeline

- Engineered a fully automated ETL pipeline using Azure Data Factory and Databricks to ingest CSV data from Azure Blob Storage, apply Python-based transformations, and load structured output into Azure SQL Database for downstream analysis.
- Implemented parameterised ADF pipelines with triggers and data flows, reducing manual intervention and enabling scheduled, repeatable data loads.
- Connected processed data to Power BI dashboards, enabling business stakeholders to access near-real-time analytical insights.

Delta Lake Implementation on Azure Databricks

- Architected and managed Delta tables in Azure Databricks, performing CRUD operations and leveraging OPTIMIZE and ZORDER commands to improve query performance on large datasets.

- Utilized Delta Lake Time Travel and Data Versioning capabilities to enable full audit trails and rollback functionality for data quality management.

Real-Time Incremental Data Ingestion Pipeline

- Built a real-time streaming pipeline using Databricks Autoloader and Apache Spark Structured Streaming to continuously ingest incremental data from Azure Data Lake Storage Gen2 into Delta tables.
- Integrated the pipeline with Power BI to deliver live, auto-refreshing dashboards for operational monitoring.

EDUCATION

Bachelor of Science in Information Technology *2022 – 2025*

Superior University, Lahore, Pakistan — **CGPA: 3.5 / 4.0**

LANGUAGES

English (Professional Proficiency) | **Urdu** (Native)
